

DENTIST PROFILES

Virginia Kirkland [DMD, MS], Guang Eric Li [DDS]

YOU WILL FEEL AT HOME the moment you walk through the door at North Point Periodontics. Sit back and let us take care of you. From our friendly, accommodating team to our comfortable, spacious rooms with expansive, relaxing views, we have you covered.

North Point Periodontics has been serving the North Fulton and Alpharetta areas for over 20 years. Dr. Kirkland and Dr. Li are periodontists with specialized training in the treatment of periodontal disease, a disease that affects structures surrounding the teeth. Dr. Kirkland and Dr. Li specialize in the replacement of your missing teeth with dental implants, as well as maintaining the health of your existing implants. They also have special advanced training in LANAP and LAPIP, procedures that use lasers to treat and stabilize periodontal and peri-implant disease and regenerate lost tissues. Gum recession? No problem. Both doctors are highly trained to cover unsightly exposed roots using donor tissue. Your results are beautiful and so is your experience.

Come in and let our team make you feel like one of the family. We have the education, experience, and technology to help you get the beautiful, healthy smile you have always wanted.
